Tin Packaging

We offer high quality tin plate packaging in an extensive standard range as well as the option of custom sizes with new tooling. We can litho print, pad print and emboss / deboss artwork to really deliver that extra impact.

Card Based packaging - Tray Packs™

Our range of card based packaging is manufactured in approximately 400micron board, with options of sustainable or recycled board. These can be spot glossed, embossed, debossed, foil blocked and can be finished with a lamination or UV varnish.

Card Based packaging - Slider Packs

This highly innovative and luxurious pack is a real heavy-weight solution for adding maximum value to your USB, SD card or CD/DVD. The pack is engineered to allow maximum artwork space whilst keeping the robust style with a quality that is unrivalled in media packaging.

Rigid board packaging

Rigid board packaging is a high quality product excellent for retail. It is a high density board that is covered with a printed paper. This provides increased protection for your product and offers a high perceived value.

MDF and Bamboo packaging

This unique range of media packaging is suitable for retail purposes or luxury gifts. You can either mount a full colour wrap to the box, heat transfer or engrave your artwork onto the variety of packs that we offer. We can also custom create packs for you to suit your requirements.
