

Memory cards have fast become the preferred memory storage format for mobile phones, digital cameras, PDA's, MP3 players and other electronic devices. As a solid state storage format it can store music, movie, graphics and other data files such as PDFs, Flash files and Powerpoint presentations.

As the capacities have grown and the price has reduced, the number of applications has massively increased.

Memory Cards & Content

Content & Memory Cards

We offer the complete Memory Card service from sourcing the content, provision of cards, duplication, print and packaging through to final distribution.

DEPENDING ON DEVICES AND APPLICATION, THE FOLLOWING FORMATS ARE AVAILABLE:

Memory Card Duplication services

With one of the UK's largest duplication capacities, it enables us to turn around all Memory Card formats to tight deadlines, whether it's for a conference or a mobile phone promotion with film clips. We have in-line and final product quality audits to ensure high product quality levels. We have data loaded memory cards with:

Music & Games

Navigation Maps

Exhibition & Directories

Advertising

Ringtones

Taster / Full Movies

Tourist Information

Company Specific Data

Demo / Full Software

Packing & Labelling services

We offer custom card labelling, from simple 1 colour designs through to 4 colour labels. We can pack all Memory Card formats as required, whether into standard dual boxes, blister packs through to bespoke packaging.

Distribution service

After production we can also offer secure distribution for your promotion.
